

Who are we?

AGE Platform Europe is a large European network, which brings together non-profit organisations of or for people aged 50+ in order to voice and promote the interests of the 190 million citizens aged 50+ in the European Union and to raise awareness on the issues that concern them most.

What are our objectives?

AGE aims to:

- fight age discrimination in all areas of life and promote older people's rights,
- voice the interests and concerns of older citizens and foster their involvement at EU and international level to shape appropriate policy responses,
- raise awareness of ageing related issues and of the opportunities and challenges linked to demographic change and population ageing.

What do we do?

AGE is involved in a number of policy and information activities to put older people and ageing issues on the EU agenda and to support networking among older people's groups. We seek to influence EU policies so that they can adequately reflect the interests of all older people.

Our work is informed by experts nominated by our members and focuses on a wide range of issues which have an impact on older people's lives:

- anti-discrimination and older people's rights
- employment of older workers ■ social protection
- social inclusion ■ accessibility ■ healthy ageing and independent living ■ elder abuse ■ new technologies
- solidarity between generations, etc.

AGE policy work is also sustained by our involvement in several EU projects.

Our vision

AGE's vision is that of a society of all ages where individuals enjoy equal rights in terms of their living and working conditions, economic situation, participation and access to goods and services. We are convinced that the achievement of age equality will not only benefit older individuals as citizens and give the proper value to their wisdom and experience. It is also in the best interest of our ageing society.

Our main guiding principles are:

- Towards a society of all ages
- Older and retired people are a resource
- Older people as self-advocates
